

PMLA Bulletin

The Official Association semi-monthly E-bulletin.

Edition: Wednesday September 13, 2017

Tree Mortality Numbers on Association-Owned Property

PML Maintenance continues to remove dead trees and clearing brush within the 805 acres of greenbelts and common area. In addition, we contracted with two logging companies to remove the bulk of the logs from trees we cut down.

Year-to-date tree removals:

5,222 trees removed

4,134 logs removed by the logging companies.

1,088 trees removed by PML Maintenance

Tree death will continue to be a problem for several more years. It is projected that even if we see significant rainfall this winter season and next spring, trees will continue to die due to the effects of the drought and bark beetle. PML will continue to work on this problem with available resources.
