

# Storm Damage 2018 – Ferretti Road

Initial damage assessment identified **3/23/2018**.

The County submitted the Initial Damage Estimate on **3/30/2018** to Caltrans. The County performed a site visit with Cal OES on **4/4/2018** and found longitudinal cracks forming. A second visit with FEMA and Cal OES was conducted on **4/10/18**.

The second storm opened the cracks that were found on **4/4/2018**, and created a sink hole.

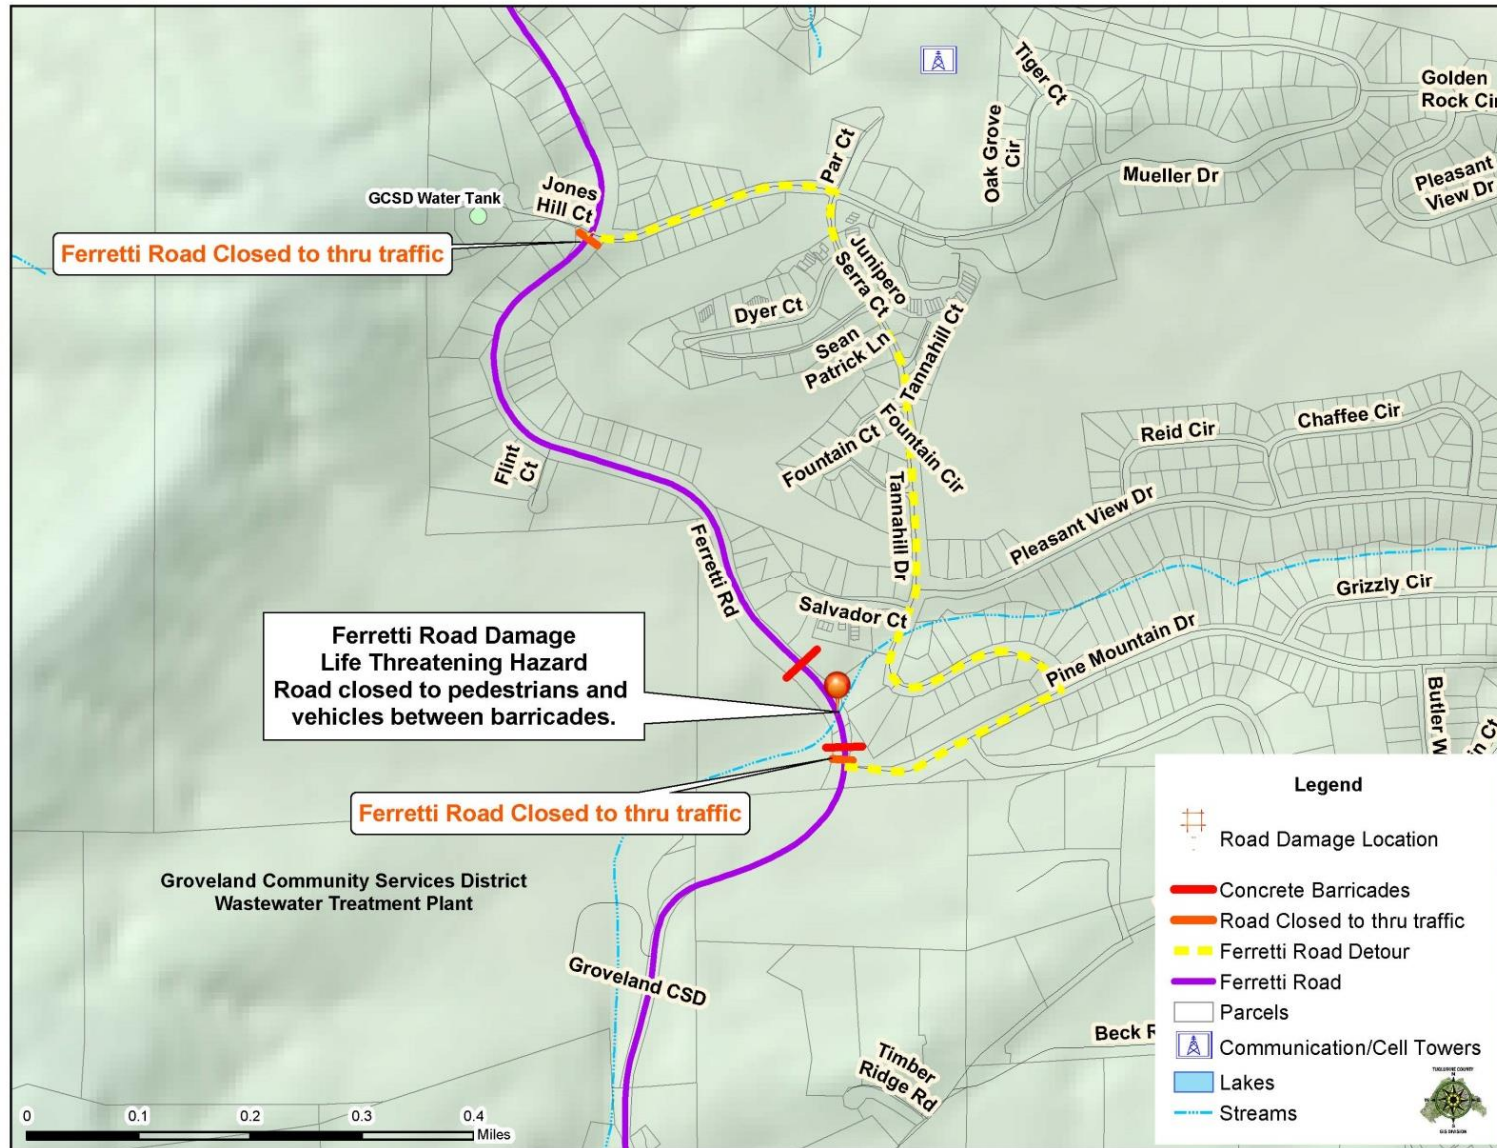

This sinkhole continued to open and became a loss of roadway on **4/15/2018**.

The County Environmental Health Director, met with the Groveland Community Services District (GCSD) and found damage to the sewer and water lines.

The County is currently working with Caltrans to fund the \$1.5 million in repairs to this facility under the Emergency Relief Program provided by Federal Highways Administration but must wait for the Governor's proclamation before requesting these funds.
