2019 PMLA Golf Course Bunker Survey

In an effort to improve the member golfing experience and playability of our Golf Course, the Association is considering the removal of some of our bunkers. The reasoning behind these proposed changes are that the bunkers listed are either; out of play, in poor condition, difficult to maintain or located poorly.

The purpose of this survey was to solicit input on the proposal from our golfing members and the following report summarizes the survey results. The survey questions listed the Golf Course hole by number and provided a short description of the proposed actions and reason(s) for the proposed changes.

The official timeframe for the survey was December 17th to December 27th, and 85 member responded.

We would like to thank the members who participated in the survey and will use their input developing our proposed changes to our Golf Course.
